Hi, David:

Good news from the anonymous reviewer. His remarks were extremely brief but very supportive (even though a small disagreement remains):

"Yes, I do think Wrone has made a good-faith effort to address my earlier concerns, and I think the ms. is well worth publishing, even if he and I still disagree with his views on the Church Committee. I do, however, think it's a serious study and adds to the debate about this issue and to our general knowledge about a significant event in American history."

Congratulations. Now, let's hope Mike delivers a similar message of encouragement. (I'm betting that he will, even if he offers caveats in the process.)

Best wishes,
